Dear interns,

You are welcome to join us on this exciting project of mining streaming datasets.

Over the past three years, our research lab has developed the world's fastest method for different streaming data analysis, and published it on SIGKDD and JAIR, the top conference and journal in big data, respectively.

<https://www.jair.org/index.php/jair/article/view/15762>

<https://dl.acm.org/doi/abs/10.1145/3534678.3539323>

The goal of this internship research project is to explore other state-of-the-art techniques for analysing streaming data and to use this as a basis for creating more sophisticated methods in subsequent phases.
